## Raised street level

The raised street level functions as a veritable street where one can find necessities in a 10-minute walking radius.

The playground is where children learn to interact with others as well as explore their skills.

Small, free recreational areas that invite the inhabitants to take care of their bodies.

Coffee and tea shops are the cornerstone of a normal street and the number one facilitator of human interaction.

Study places to find and share information and a space to connect to the world digitally.

With two working parents a daycare is a necessity in the modern street.

Guestrooms outside of the apartments are an invitation for friends and family to come visit.

Bakeries are able to flourish since there is no room for supermarkets.

The laundromat is an invitation to share household resources.

Sharing of tools and skills are important to grow a sustainable and caring community.

Garbage is collected on the raised street level but brought down to the route below once a week.

The occasional market is an opportunity to share the food that can be grown at the semi-public spaces of the upper apartments.

The water systems and all technical installations are based on the street level. They share in collective use of water and electricity.

Recreational sports activities are essential element of social interaction.
