

More information about our library

Dear tutor,

The academy library has an extensive collection of relevant professional publications. To support students and teachers throughout their studies or in preparation for lessons, new publications are acquired continuously.

As a tutor you have borrowing rights and you can physically view the collection in the academy or consult the catalogue online. If you cannot find what you are looking for, do not hesitate to ask the librarians for support. If you would like to bring a publication to the attention of students that is not in the library, ask the librarians to purchase it.

Suggestions are always welcome!

The physical library collection consists of more than 12,000 specialized titles in the field of architecture, urban planning and landscape architecture. The materials consists of books, (digital) maps, periodicals and multimedia. In addition, the library has licences to external databases (e.g. JSTOR, Art & Architecture Source) with many scientific articles, that are often available in full text.

All the material is accessible online through the [CataloguePlus via MyAHK](#) with username and password, containing the library's own holdings and the databases:

If you do not have a MyAHK account you can consult the collection via the website, but then you have no access to full text articles: <https://webopac.ahk.nl>

More info about our library can be found through this link: [Academy library](#)

Librarians: Alexandra Nicolau – Matty Gaikhorst
